BEE AND HONEY HIGHLIGHTS

FLORIDA: Honey production in 2004 was 20,090,000 pounds, up 35 percent from 2003. Florida ranked third in production behind North Dakota, and South Dakota. There were 205,000 colonies in Florida in 2004 with an average honey yield of 98 pounds per colony, 27 pounds more than in 2003. Producers received an average of \$1.00 per pound for the honey, down 32 cents per pound from the previous year. The value of Florida honey production in 2004 was \$20.1 million, up from the 2003 value of \$19.7 million.

UNITED STATES: Honey production in 2004 from producers with five or more colonies totaled 184 million pounds, up 1 percent from 2003. There were 2.56 million colonies producing honey in 2004, down 2 percent from 2003. Yield per colony averaged 71.8 pounds, up 3 percent from the 69.9 pounds in 2003. Colonies which produced honey in more than one State were counted in each State where the honey was produced, therefore yields per colony may be understated.

Colonies were not included if honey was not harvested. Producer honey stocks were 61.2 million pounds on December 15, 2004, up 50 percent from a year earlier. Stocks held by producers exclude stocks held under the commodity loan program.

Honey prices decreased during 2004 to \$1.08, down 22 percent from \$1.39 cents in 2003. Prices are based on retail sales by producers and sales to private processors and cooperatives. State level honey prices reflect the portions of honey sold through retail, co-op and private channels. U.S. honey prices for each color class are derived by weighing quantities sold for each marketing channel at the U.S. level. Honey prices for 2004 were lower than the previous year for all color classes except the All Other Honey, Area Specialties class. Honey prices for 2003 crop honey reflect honey sold in 2003 and 2004.

CATFISH HIGHLIGHTS

FLORIDA

There were 46 catfish operations in Florida on January 1, 2005. Total water surface area was 650 acres, a decrease of 60 acres from 2004. Most of the acreage was for foodsize fish (630 acres) and fingerlings (35 acres). Total sales in Florida in 2004 were \$1,139,000. The majority of the sales were to processors.

UNITED STATES

Catfish growers in the 11 selected States had sales of 480 million dollars during 2004, up 13 percent from the previous year. The top four States (Mississippi, Alabama, Arkansas, and Louisiana) accounted for 95 percent of the U. S. total sales. Nationwide sales of all foodsize fish increased 14 percent from 2003 to 451 million dollars. Fingerlings and fry sales totaled 22.2 million dollars, an increase of 4 percent from 2003. Sales of stockers totaled 6.26 million dollars in 2004, a 1 percent decrease from the previous year.

By point of first sale, direct sales to processors accounted for 94 percent of the total sales of foodsize fish while 93 percent of the stocker sales were to other producers. Remaining sales were for recreational use, to live haulers, or for retail, government, or other uses.

The water surface acres being used for catfish

production as of January 1, 2005, totaled 174 thousand acres, down 2 percent from the 178 thousand acres used a year earlier. Of the total acres, 5.50 thousand are to be renovated during the period of January 1 to June 30, 2005. An additional 796 acres are under construction or expected to be constructed and in use by July 1, 2005. During the period of July 1 through December 31, 2004, the area taken out of production totaled 9.55 thousand acres. As of January 1, 2005, foodfish were produced on 145 thousand acres, fingerling producing acres totaled 21.5 thousand, and 3.93 thousand acres were being used for broodfish.

Catfish producers had 1.03 million **broodfish** on hand January 1, 2005, down 6 percent from January 1, 2004. Large **foodsize** fish (over 3 pounds per fish) on hand totaled 10.4 million on January 1, 2005, down just slightly from a year ago. The number of medium foodsize (1.50 to 3 pounds per fish) decreased 11 percent to 93.7 million, while small foodsize fish (0.75 pound to 1.50 pounds per fish) numbers decreased 1 percent to 240 million. Large **stockers** (over 180 to 750 pounds per 1000 fish) on hand January 1, 2005, at 269 million fish, were down 6 percent from the previous year. Small stocker (over 60 to 180 pounds per 1000 fish) numbers decreased 32 percent to 387 million. There were 704 million **fingerlings** on hand January 1, 2005, down 3 percent from January 1, 2004.
